

BREADCRUMBS: TRACKING THE PRESERVATION OF GOD'S WORD THROUGH TIME

PROJECT OVERVIEW

Goals

1. Find historical evidence that supports our faith in God's inspiration and preservation of the Bible
2. Equip the church by distributing our findings through brief, easy-to-understand presentations

Guidelines

1. We believe the Bible is inspired and preserved by God and that our research is merely aimed to find supporting evidence for this faith-based approach to scripture
2. We will conduct all project work in the context of and in submission to our local church
3. We will approach our work prayerfully, understanding that our involvement in this project has major spiritual implications
4. Our research will adhere to the same documented standards as college and university publications
5. We will address controversial subject matters and findings as a team with faith that God will keep us unified through the adherence to these other guidelines
